

Stronger Christchurch

Infrastructure Rebuild

Works Notice

We are starting the renewal of the sewer pressure main on Main Road, Redcliffs, in the week of Monday 15 August 2011 for approximately seven weeks.

10 August 2011

The red line shows where the sewer will be relayed.

Please be aware of the changed traffic conditions. Reduce speed (30km/h limit) and take care with merging cyclists.

- We are relaying the sewer pressure main under Main Road between Redcliffs Park and Barnett Park.
- This work will start in the week of Monday 15 August, and take place between 7.30am and 6.00pm, Monday to Saturday. The work is expected to finish by 30 September 2011. All works are subject to favourable weather and on-site construction conditions.
- The work may result in increased dust, noise and vibration levels because of underground drilling.
- Works will have little to no impact on current sewer services.
- Works will impact on traffic movements. The two traffic lanes will be maintained but the footpath on the east side of Main Road will be closed and cyclists on both sides need to merge into the car lanes. Access to residents, emergency and service providers will be provided. Please be aware of the changed traffic conditions. On-street parking is not available in the immediate work zone.
- If you have any questions about this work please contact us on **0800 277 34 34** (7.30am to 5pm Monday to Friday) and we'll be happy to help you. If you have any other questions about earthquake damaged infrastructure please contact the Christchurch City Council Contact Centre on (03) 941 8999 or check our website: www.strongerchristchurch.govt.nz
- We will endeavour to keep any disruption to a minimum. We apologise for any inconvenience and appreciate your patience while we do this work.

If you are not the owner of this property please pass this notice on to your landlord or property

The Stronger Christchurch Infrastructure Rebuild Team is repairing the city's earthquake damaged horizontal infrastructure (roads, water supply, storm water, wastewater systems).
